

FIRE PREVENTION

Be careful with the use of fire.

Chargers for tablets, smartphones etc. must be placed on a non-flammable and stable underlay, with good distance to curtains, upholstered furniture and similar.

Candlelight and decorations must be placed on a non-flammable and stable underlay, with good distance to curtains and similar. Keep lighted candles under constant review.

Smoking can only find place in the designated areas. Cigarette butts must be collected in non-flammable containers with lids. The containers must not be used for any other purpose.

Waste bags etc. Must be removed daily and placed in special garbage rooms.

Ironing facilities, electric kettle, Coffee machines, etc. Must always be interrupted by the outlet, when they are left (even for a brief moment)

Oil-cloths etc. Can self-ignite and should after use be thrown in iron containers with tight-fitting closure.

Flammable liquids (such as gasoline, kerosene, acetone and alcohol) *should be used with caution and stored in well-sealed containers.*

Self-closing fire doors must not be open, unless the smoke detectors provide automatic shutdown in case of fire.

Emergency exits, escape route doors and escape routes shall not be obstructed, and there must be nothing stored in the escape route and in the stairs.

Fire-fighting equipment must be kept "easily accessible".
